We are engaged in manufacturing and distributing of a broad array of Membrane Filters, Microfiber Filter and Cellulose Filter to our prestigious customers.

About Us

Established in the year **2013**, we, "**Shri Krishna Scientific Company**", are engaged in manufacturing and distributing a wide range of Membrane Filters, Microfiber Filter and Cellulose Filter. All our products are manufactured using superior grade raw material, therefore renowned for their unmatched features such as precision engineering, sturdy construction, durability, less maintenance, and others. For further improvement in our range, we have developed sophisticated research and development unit and also hired a specialized team. They keep themselves updated with the advancement taking place in the industry as well as keep a proper track of upcoming changes that are in terms of formulations, technology, and many others.

Our company has established an advanced infrastructural set-up to meet its set production targets on-time and carry all operations in a hassle-free manner. It spread across a wide landmass and is categorized properly into several units so that each operation can be performed separately. Our infrastructure encompasses departments such as production, quality control, administrative, logistics and many others.

Under the able guidance of our mentor, "**Mr. Anuj Goel (Owner)**", we have been able to establish a strong foothold in the industry. His vast knowledge, wise managerial skills, domain expertise, constant motivation and leadership skills have enabled us to stay ahead over our competitors in this...
